

AMERICAN HOMELIFE ®
iBook: Information Age universal co-creating

AMERICAN Homelife ®
americanhomelife.org
-citizen culture-

AMERICAN Homelife affirms cultural democracy's human heritage in world citizen culture with science & service, 'Civil Season' of 'Hapi Months'. Today, with common sense scientist Benjamin Franklin we fly our kite and make our own computer. Today, with empathetic liberty philosopher Thomas Jefferson we write on our computer our declaration of independence, our statements of purpose. Today, with Mr. Madison we post our freedom messages on computer bulletin boards to better share our unfolding awareness and expanding consciousness in caring citizen people communities. With electronic mail we use email marvel in modern horseback-transported version by sending our private letters or networking others with our alternatives to official views. Real life is experiences we care/ share in communities/ homesteading web in reality, not illusion.

We want the network paradigm in power of many-to-many online communications of pacific public spaces, a homelife forum, for individual interests/problems in rational discussions for refining solutions. Broadcast paradigm of one-to-many where masses pay to be fed information by the few who profit from their control over media is here with potential for caesar-clergy-citizen tyranny. Broadcast paradigm is too when one can have people get to large bodies of useful information that can help them rationally live their lives. Network paradigm invites community-building power that allows people to help each other solve problems, one to one and many to many. People govern when they talk rationally-widely-freely-publicly-safely in groups. Growing databases and growing real-life web of human relations is where in yang-n-yin equality principle we make Good Life happen in common law and citizen decision. Not top-down design, but rather grass roots populist has information-rich telecommunication power. Using electron-magnetism force of electric light and computer, popular *civilRepublican* tools, people have small-town atmosphere, coffee shop conversation while working at home in increasing networkability among *universalInformation* generation.

Our electronic village of vital community/ commerce matters to US all in cultural democracy on and off the Net. It is our high-speed information superhighway. We think universal and act local. Computer literacy is contemporary and the great equalizer. Everywhere computer literate people are with computers connecting to the Internet in city apartments, suburban houses, rural homesteads, trailer parks, and the most remote global villages. Computer teachers and users are in schools and at truckstops. Affordable computers and access to the electronic superhighway are available and becoming more available. Interactive-intercreative-interconnecting people are going on the interlinked network for authentic communication, commercial desire, and some dribble.

Cyberspace citizens fear hackers who turn electronic thieves- techno criminals- nuclear terrorists. Hackers try to get computer system passwords. With passwords they obtain records, private files, email, etc. Hackers **abuse** security of the technical and human system. Stopping invasion of personal privacy is a common law citizen issue. We know of orwellian possibilities, a panoptic danger when on Net or using credit/debt card that transactions personal and commercial, religious and commercial may be recorded. Giant corporates/ governments/ religions are online, too, concentrating ownership of global communication media into their hands of a **very** small number.

How we use communications technologies is critical to universal homelife. Hometown locals can interact in shared consciousness on issues better in the Information Age universal co-creating. Groups connect globally [interplanetary]. Individual graphic artists create and sell product to a world of consumers. Students who live far away from centers of learning can access university curriculums and download great research libraries onto their desktop! Electronic mail can be sent worldwide. Online individual interests have extension in wider efforts and communities. Computers can be the electronic common culture american fraternity without ownership slaves nor wage slaves in developing, expanding real opportunities for US all in cultural democracy. Computers are nexus of widespread communities of interests with and without extensive resources. Cultural democracy has a digital future not with over-commercialization nor dumbing-down drivel, not with hyperrealists nor monopoly media moguls but with bonfire timeless Truth enquiry in open space of real caring/sharing by attentive citizens engaging in authentic human interaction, real reference, and rational discussion. Independent enthusiasts find online rich culture, free expression of ideas in problem solving, and closely knit community building from power of *universalInformation* electronic democracy.

Taken from U.S. Department of Defense, Internet is becoming among americans [world citizens] a tool for intercreative global interconnection-open information-good economic opportunity-great equalizer. With U.N. vote 2001 for universal literacy, most everyday people will be on-line! With UN literacy vote for informed world people, Internet creation for sharing information, and two nuclear energies for universal space exploration... we welcome becoming part of asking modernity in *universalInformation* awareness ready for space colonials of cultural democracy's human heritage.

Our Internet Age is 'kicked off' within the United Nations at their New York City headquarters, when most member countries and a few nations-stated vote for universal literacy 2001CE. With everyday people everywhere reading and with literacy supported by now democracy countries, the technology of Internet puts new republican world citizen american together as never before. We, the *universalInformation* generation, personally-privately-publicly-planetarily live productivity daily in **mutual** modernity and hope. Information Age universal co-creating generation brings together global interactions and interconnections, intercreativity and intergenerational community of living now democrat under Truth. Cooperative global projects in fields of endeavor are commonly done on-line. With more people on-line and participating as rational thinking/feeling and doing decency-dignity-democracy [of 'I can' new republican], naturally there's an explosion of ideas/ information among dynamic democrats as never before seen when medieval hierarchs denied people the literacy technology.

We want new technologies and collective /individual efforts to build, never destroy ourselves nor continuance in cherished progeny, and to live in principles of homelife. We want mutuality among global countries. Old Democrat- Old American- american homelifers want pacific-centered, co-creative, rational, democrat focus from the long common citizen culture of human heritage. 'New DDays New Story' joins US all in cultural democracy among *universalInformation* generation. We 'ameri' [all people] make our own good interconnections that includes aFamili- mFamili- eFamili- rFamili- iFamili telling their own human story in their own words from their own viewpoints for the wholesome continuance of our forbearers with US all, each world democrat in doing ['dday'].

We, the Information generation of new republican world citizens, live in principles enjoying and exploring our human story of unfolding natural laws with citizen culture, american homelife. We ameri are naturally/ universally inclusive in an Americanism from Classicism. AMERI Ages holds our human story of unfolding awareness. As our forbearers before, we adventure daily. The *X Prize* wants to have everyday people in space. Pacific-centered citizen people, the Information generation universal co-creating, do means and dreams in principles from AMERI Ages. Problems we engage rather than run-away in retreat/ defeat. In myriad spirited thoughts intuitive-rational-empirical we are **the** dynamic engine of cultural democracy in new intercreativity. Internet invites the equality global forum. Opening to a world of ideas, welcoming viewpoints, we citizen people of timeless Truth are here and hope the same quality of life or better for our progeny. Rich still do their godlife in king story. Religious still do their godlife in God story. Republican, me and thee, do every day our goodlife with homelife in human story. Priest says 'POP': Pray- Obey- Praise strategy to God's revelation in timeless Truth. Teacher says 'ASK': Ask honestly. Seek courageously. Knock temperately....strategy to Nature's reason in timeless Truth. Different strategies to gain nature home/ human homes and heaven home! Natural critical enquiry of cultured is not supernatural worship of religious. [ASKing physical science probably ... human is dust to dust, and life is methane to methane.]

new word 'hapi'

Hapi is new word for US all connecting in the global good life of cultural democracy's common human heritage. Homelife character/culture/commitment is US all. Citizen scientist meditates/asks physical universal principle for natural law. Citizen civilian in self-family-democracy-humanhood meditates/asks social universal principle for natural order. Life-Logos-Nature is natural law & order, logical pattern, and predictability that we want to bring everyday people comfort. Natural laws' discoveries we welcome with 'eureka', then learn/ live/ love/ share generationally in community. Be hapi together, natural world citizen, with Nature's reason in principle whether natural theist, natural deist, or pure naturalist in worldview on timeless Truth. Human heritage are we in Civil Season/ Hapi Month.

'Hapiday'

Be hapi together, world citizen [american], one hapiday a month in civil season. Enjoy universal ideas/ principles in monthly joy appropriate to natural critical enquiring citizen people in principles of conscious of *cultural democracy's human heritage* ['homelife'].

Cultured North Asians of Ancient Age 'yang/yin' equality universal principle expand to 'truth-compassion-tolerance' principles with Confucian-Buddhan-Classical citizen of Meditation Age for social freedom '4principles' identified and later adopted by medieval Religious South Asians; then 1789CE French revolutionary slogan returns the Cultured North's natural behavioral social principles, american inclusive 'integrity' completed, for 'freedom homelife' *liberty-integrity-fraternity-equality*, artistically materializing *civilRepublican* consciousness at Mount Rushmore with model '4presidents' for global independent democracies in civil societies to refer.

home of world citizenry

It's easy to take for granted everyday people's human rights in compassionatefraternity, literate economy yang/yinequality, truthintegrity written common law from natural law, and tolerantliberty in asking Nature's eternal truths of reason for reality from classical to american cultured traditions, physical universal principles with asking citizen scientist/ social universal principles with asking citizen civilian. Our human heritage is hapi together in caring/sharing global human story of cultural democracy with common citizen culture. Right to read opens our horizons, yes to dangers, but also to an arena of ideas. Right to read and write empowers we the people as never before to keep human home memories of me[diary-vocation-avocation]/ family/ citizenry/ humanity.

Not so long ago, human life is difficult/short. Feeling the wonder and simple pleasures of nature home and human home peasant people [illiterate] sometimes enjoy, Pieter Bruegel, the Elder surprises the world of his time with his paintings in Flemish School style [1565 'Hunters in the Snow', 1566 'The Wedding Dance']. Wonder surely is in Nature, in culture, and in literate citizen culture. You in your own way be amazed in daily wonders, not leaving these good feelings only for 'hapi April earth home world goodwill' or 22 Earth Day. Religious belief is supernatural miracle God story. Cultured understanding is natural wonder human story. "Wonder... is the seed of knowledge." - F. Bacon

Machines arrive. They free US all from drudgery of farming/ fishing/ hunting for survival. More rested we look around and realize we have no thought of books/ teachers, creative rational literate thinking/ universal principles cherished. New discovery of gravity energy force in Education Age physical science brings on machine industrial revolution that in turn gets rid of king/queen, whom we before believe help our sun to shine, wind to blow, water to rain, and crops to grow. In gravity principle, not royal person, is understanding of orbiting sun, falling rain, etc. Rich royals/ divine clergy did, are doing, and will always do their own written memory, economy, viewpoint, and agenda that does no justice to human story. In physicalEducation / civilRepublican consciousness everyday people once again begin to be important. People are invited to think/feel and do in principles rational as once they did in Meditation Age. '4Principles' found in socialMeditation tolerance-truth-compassion-equality are returned at Mount Rushmore in liberty-integrity-fraternity-equality conscious modeled, not by administrator of emperor, nor priest teacher of Buddhan philosophy, but by representative principled presidents of new republican.

In good health/ open information we're naturally citizen scientist/ civilian taking care of self with interests/ friends- family- citizenry- humanity. Watch baby citizen scientist physically asking, his/her questions about nature home of heir/air- ocean water- mountain earth- energy fire in physical principle. Youth is a natural explorer, asking natural law & order with each year in ever more Thales milesian physical/ Confucian-Buddhan-Classical social sophistication and understanding of universal principles from universal experience. We're born scientist/philosopher: Citizen people ask. Good cultures encourage rational understanding without addictions, godly religions revelation belief. Over AMERI Ages, and bit by bit we ameri are happily finding the answers that in turn increase our quality of life issues. Alive to wonder/physically asking Nature outside and in you, you're a Thales citizen scientist; Solon citizen civilian, Socratic citizen of the world, Franklin new republican, Thurgood american. We **are** learning natural universal principles in Thales/ Solon natural critical enquiry for repeatable patterns of nature home or nature environment and human home or human environment. What will my family members tolerate from me? What is the truth of my human home behind family door. Am I equal to the task of mastering the math my teacher wants me to understand as his/her student? How compassionate are members of my chosen friendship circle? Alive to potential-vital-Truth enquiring-principled culture-intent I'm here to contribute my talents/ views as before my forbearers contributed to the common good. Thanx. Nascent citizen, me in common citizen culture, is naturally born baby in eager learning, lives youth/ teen in exploring, matures to love in fidelity parenting, and sweetens to elder citizen in harvest contributing that may become my literate age dignity memory forbearers' saved/ cherished teachings.

Outside and in me is natural prosperity. I'm hapi american homlife. To dday!

Welcome Back Alexandrian Librarians.

Information generation sees renewal of Alexander Museum Library in Egypt. Welcome its return of universal literate, pacific-centered humans of humanity. Classical tradition in Truth quest natural and literate is finally regained. We, literate age dignity universal citizen, can save own memory for natural audiences of interest without royal/religious abuses, hopefully forever. How fragile are thinking/feeling and doing, citizen people in human story with militant caesars and clergy!

Violence to informational integrity can be savage or imperial, certainly alien to common citizen culture. First emperor of China burns books to secure his imperial royal rule, not much different from China's Cultural Revolution that goes after landowners/ Confucian teachers/ book burnings. Waiting to be shipped along Mediterranean shore, copies of Alexandrian scrolls are destroyed **accidentally** by imperial Caesar militarily waging his war. Year 1258 ends Islamic Caliphate with sad Mongol conquest of Baghdad. Baghdad books from vast libraries are dumped by Mongol savages into Tigris River! Year 2003 how much memory is lost by Gulf War II with looting by illiterate locals savages of their very own literate treasures in museum and library!

For religion and to please his clergy, Bible/ Constantine [Holy Roman] theocrat Theodosius goes after the Alexander Museum Library itself! Christian Archbishop Cyril of Alexandria and his godly warrior desert Bible monks help Emperor Theodosius **purposely** attack Classical structures. Why? Religious medieval-mindedness value **only** the library in the sky [Akash] and think human heritage Alexander Museum Library is trash. In religious Biblical mideast famili v. cultured Classical european famili, the violence wins [book burnings- library burning- torturing Hypatia math teacher/ head librarian]. Using terror as political weapon of militant activism, imperial Bible religion destroys Classicism, erases *socialMeditation* consciousness of european home of science and democracy, and wins social medieval millennium in continental Europe with clergy of Bible Christian God story, miracle religion 500-1400CE.

Scholars at Arab universities save most of written natural Classical tradition that we have today. Questing for timeless Truth in natural law & order Nature's prosperity with universal physical principles for science and universal social principles for society, Classical tradition is saved by Arabs. Without Arab scholars, who love and save Alexander Museum Library and Classicism's natural quest in understandings, there would be no Old Democrat/ Old Republican, Greco-Roman story to inspire *physicalEducation* educant/ *civilRepublican* world citizen. To Arab scholars, a thansgiving.

Alexander Museum Library is returned to Alexandrians and literate world citizens at dawn of Information Age universal co-creating. It has an electronic reference component that makes it less expensive. More numerous than precious/ lost by burning 700,000 scrolls of *socialMeditation* Age, contemporary universalInformation Age Alexandrian Library has 9,000,000 books, electronic and physical. Trying to be an open information institution, new Alexandrian Library has some books Muslim mullah clergy oppose, making some people against the Alexander Museum Library. However, only the president of Egypt can censor a book. Book censorship is out of the hands of clergy and everyday people. Hopefully, with new Alexandrian Library, the middle nation of Egypt [*basicAncient* Age teachers to the world in word/math beginnings] will rebirth a shining greatness similar to when university Arab thinkers once brilliantly tied our world together in literate good global trade and in caring/ sharing new thoughts. It is a whole new global modern library for we, world citizen cultured and hapi together. Hopefully, this good asking institution is built and not burnt again by godly praying clergy. Here, is an open institution that can be visited without fear by all, no longer denied literacy by modern nor medieval hierarchy. Long live middle nation of Egypt in teachers' return!

Basic technology for the Internet is created in the 1960s by the United States Department of Defense in case of a nuclear war. World Wide Web begins to get popular in the mid-1990s. Internet world citizen in global democracies makes this modern technology a good supporting experience for everyone everywhere, as ancient technology of fire brings warmth and cheer over terror and fear. Overcoming violent medieval-minded intolerance, Information co-creating world citizens commit to mutual modernity, want human heritage libraries, and are willing to cooperate in global communities of democracy countries [world famili, multi-national] and nation-states [one nationality].

Literate-rational-independent global citizens decide their tomorrows in careful choices, today. Rich royal culture, divine clergy religion, and new common citizen culture have different powers. Pacific-centered, productive, mutual modernity [Information generation world citizen cultured] cares/interconnects, challenges/ co-creates. Making careful choices in natural critical enquiry, we rational new republicans are growing homelife one person at a time in our creative dreams & schemes, businesses & communities, loved adventures & doing *d*day. Feel at home in natural Nature's patterns and promises. Advance in pacific-creative-rational productivity, never destructive. Modernity, technology, and world citizenry is yours individually/ collectively networking positivism. Grow the common good for me/ progeny/ democracy country/ humanity. In the common good do all: This is sovereign mandate of citizen culture that is written in all our democracies' constitutions, affirmed with deeds at home, and extended in foreign policy.

We need human heritage librarians to take care of our human heritage of natural asking citizen people. It's hard to imagine medieval clergy so uncaring of human story in natural critical enquiry as to be bleaching pages of a math book written by Archimedes to write verses of God story prayer. At the beginning of Information Age universal co-creating Dr. William Noel of The Walters Art Museum with a team of experts is chosen to handle Archimedes book that is the only material witness to the mind of an Old Democrat 'milesian meditator', an old scientist from the Thales Ionian Thinkers' tradition, and a mathematical genius who dies 212BC. Scientists are working to recover text from this fragile document deposited by owner with Noel in a duffle bag! Archimedes Manuscript explains how he makes his discoveries, calling it The Method. Archimedes is taking the first step towards calculus 1800 years before it is reinvented. Books are the material remains of naturally spirited human thoughts. Archimedes in bath shouts 'Eureka': In joy of mindful adventure/discovery he finds a physical universal principle. Archimedes' Meditation Age 500BC-500CE evaporates to medieval millennium 500CE-1400CE of royal/faith hierarchy, who have zero interest for literate people of cultural democracy in natural critical enquiry doing science/ math, ideas/ ethics, social history/literature. So, little happens for human story librarians, Alexandrian or other, to save. People are systematically denied literacy: Archimedes is systematically consigned to oblivion, washed clean, re-used, and written over. His manuscript becomes God story prayer book at eh Mar Saba monastery in Judean desert of middle famili MidEast. The european famili of nation Greek Archimedes/ his works lay hidden in monastery library tower until Information Age 2000CE-now!

Modernity can regard Alexandrian Library and the Internet as a common decency indicator for us, universalInformation generation of literate world citizen. Playing by ground rules of common decency we're with cultural democracy's human heritage, hapi together. Internet is attacked autumn of 2002CE, but does not go down. Not all thirteen servers are destroyed. Let's avoid another democrat dying, scientist not asking, nor Internet crashing. Let lessons of loss from fragile Old Democrat/ Republican and Alexander Museum Librarians be very clear. Our rational structures of global democracies including free libraries are to be cherished by US all. Happiness is measured in lives well lived. The U.N. universal literacy decision, the public Internet creation, and the return of Alexander Museum Library helps cultured world citizen in universal homelife.

As we *ameri* ['all people'] live long common culture's natural critical enquiry, we'll be realizing *american* ['world citizen'] cultural democracy joining *ameriren* ['world humanity' principle], especially with US all hapi together in winter civil season: 'Hapi December Human Rights Remember'

'Hapi January Now Democracy'

'Hapi February Prime Ministry/ Presidency'.

At the dawning of our Information Age on 23 Oct 2002 thirteen Internet servers worldwide are attacked in early morning, and seven go down. Redundancy alone keeps it going without global public alarm. **Integrity** information is to be enjoyed and carefully saved. Careless citizens bring on their own dark ages by taking for granted rational support structures, like human heritage libraries and Internet. Tolerant asking **liberty** that overcomes powers violent and superstition is part of the cultural behavioral 'freedom homelife' ideology we cherish. The common good Classical *agape*-Confucian *ren reciprocity* humanity-Buddhan *right* principle-U.S. general welfare- French **fraternity** is one in written human right from social universal principle in natural mandate from lived/learned self-evident truth of universal experience. Off and on-line learn fraternity. Literate economy people **equality** is returned in Education Age, and generatively earned. No rich royal of oligarchal bank/corporation, nor faith divine clergy of heaven home, can do citizen people's work of human home in equality literate people economy. In natural advocacy we democrats do economy for the **common good** of our public home, our citizen family that is of little interest to others. To do our freedom education and our freedom homelife we need global human heritage library & modern science university, Internet servers & open up-to-date accurate information. Asking common cultured find 3force nature home [gravity-electromagnetism-nuclear] and with homelifers continue co-creating the pacific-centered universal productive modernity. Meet/defeat immaturity/violence. Continue daily citizen culture.

Like fire in Ancient firebringers, information builds US all up or burns US all down in modern nuclear destruction. Citizen people, no longer peasants, put *universal/nformation* to pacific purpose, increase human survivability, and interconnect in participations creative/ critical, rational/ natural appropriate to global common cultured citizen in timeless Truth. Hapi together we can care/share seasonal/monthly focus. Hapi together we play in the contemporary universal arena of up-to-date ideas/ principles and different human viewpoints made sincerely welcome, available, and open for discussion to US all in cultural democracy with use of human heritage libraries, Internet, and pacific nuclear power. There are so many different human efforts that focus on the common good and build good inter-connections physically/ psychologically for human homelife culture with caring empowered freedom-oriented citizen people. Having 'famili weekdays', homelifers seek plural positivity in cultural memory with forbearers for wholesomeness and wider truisms. We move to higher levels of human heritage awareness in the *pacific-purposeful-productive universal/nformation* generation interconnecting-interacting-intergenerational in social/common community of we world citizens. We do for the common good, interconnecting abiotic, biotic, and human. Leanings by royal and religion agendas on citizen culture agenda can overwhelm, confuse, destabilize, and cause endless safety/security issues or war. We see better without corporations corrupting country democrat. We see better without clergy escalating theism/deism into civil society. As clergy take care of heaven home in the name of God, citizen people take care of human home in principles of cultural democracy. EXAMPLE: Speaker of Assembly brings his worldview natural theism into U.S. first republic by writing his *Word of God* words on civil Liberty Bell. EXAMPLE: Wealthy rich royal, head of a global oligarchal corporation but with/without public family citizenship, buys ownership of water rights to ones independent democracy country or county or town. In principle citizen people take care of human home self/family/citizenry/humanity. No rich royal nor divine clergy does human home agenda without citizen people approval. Strangling new year new republican, is done by imperialism over republicanism. In *universal/nformation* conscience we the people must take responsibility for the well and woe around *me-thee-we* each and every doing dday. Cultured citizen at work and play, responsible and inspired, may join in civil season and hapi months unity.

Expanding upon the traditional work of Alexander Museum Library, we again collect human heritage as Classicists once did so long ago, have american fathers put their child/ren on knee at night to read, and say with new republican Franklin in open Internet and librarian real liberty information 'I can' do *common* decency, *age* dignity, and *now* democracy. Informed with accurate up-to-date information, I'm Sunday citizen scientist. Now democracy we address daily in **our** human home of public citizenry. I'm Saturday citizen social in public service. Common decency is a universal principle conversation *UP&UP* among universal citizen people. Literate age dignity lets me have written social history in personal diary of self with endeavor communities/ private family/ public family/ planetary humanhood. We look for age dignity record in social history with factual scientific accuracy and careful reference to original sources. This is different than supernatural clergy story writ that often does not reference, sometimes prefers metaphor over actual fact, rearranges for dogma, and then chooses not original authors of ideas but their own divine clergy or sainted human agents of change always in other than natural human story. Human famili story is a new format for saving literate age dignity memory with african famili stories, middle famili stories, european famili stories, renien famili stories, and inamerican famili stories coordinated in principles of cultural democracy's human heritage. Care/share human famili in thanxgivings. Care/share freedom *homelife* in principles *liberty-integrity-fraternity-equality* with each democracy's unique rushmore representatives. In AMERI Ages culture we begin in universal principles the universal interconnections, asking adventures, and understandings without addictions of comfortable citizen.

United Nations is a global community of multi-national countries and single-nation states. UN relies on Internet and global librarians to connect our world's people in peace and humanhood. We ameri [all people] can write our viewpoints on ideas-issues-ideals that join US all in the cultural democracy dialogue of principled citizen people. Common citizen culture is done by literate empowered everyday citizen people, who take care of human home and nature home. No, longer denied literacy by our clergymen, everyday citizen people can read, write, and have the natural literate culture. Contemporary citizen culture has literacy, and the UN is openly voting for and supporting universal literacy. Democracies vary, but there are social universal principles that unite US all hapi together in co-creative cultured people of the principled *universalinformation* generation. Literacy is key to be democrat, not peasant. Literacy opens door to citizen people writing their own record, choosing their own representatives, and deciding in principles their own common good agenda. This is different than the dark age gross **dependency** on medieval royal/clergy. Democrat advocates daily by enjoying the natural critical enquiring approach to timeless Truth, participates in literate common community, and lives common culture in universal principles. Joy is universal citizen culture!

Common Sense/ Empathy

Most humans are born common sense scientists and empathetic kindly wisdom philosophers. Developing common sense we become citizen scientists. Developing empathy we become citizen social workers of public service. In principles we citizen people are cultured. We citizen people scientist/civilian are the natural extension of human home heritage from forbearers of contribution.

Forbearers, thanx.

Human famili, thanx.

Now, it's my turn to contribute to the common good of **humanhood-our citizenry-my family/famili** -each.

Hapi **homelife** to US all!

“Civil/Hapi Human Are We”

Civil/hapi human are we, the *basicAncient* survival helpers-

the *socialMeditation & physicalEducation* freedom searchers-

the *civilRepublican & universalInformation* community writers.

Human home are we in AMERI Ages’ unfolding truisms from forbearers.

?

*In cosmic grandeur of ideas
citizen life joins Life.*

In world citizen culture we are hapi together in rational mind that conceives of constitutional government, republicanism, and skepticism (natural critical enquiry, or asking). One’s democracy country or nation state is never to be in service of any brutal and brutalizing mercantile/ corporation domination ethic for empire over a humane-civil society. Truth-compassion-tolerance-equality of *socialMeditation* reaches to our 4human homes in world citizen culture, american homelife. Cooperation and care put over domination and deception.

?

‘*Khurdi*’

Natural citizen culture is joined to supernatural clergy religion, not by naturalist citizen nor by deist citizen but by theist citizen, who chooses union of natural reason and supernatural revelation. One such famous theist world citizen is among the founding fathers of Pakistan, Iqbal. Dr. Allama Muhammad Iqbal [1877-1938 CE]. He describes the importance of ‘*Khurdi*’ [Persian word for the idea that a person should know exactly what his/her abilities/potentialities are and how these can be used for the good of humanhood- the common good agape- ren reciprocity- the general welfare- right action]. His book Secrets of the Self [Asrar-i-Khudi] incorporates this idea. His last wish was to yoke modern natural science and natural philosophy [kindly wisdom] to supernatural Islam religion:

“In the West, Intellect is the source of life,
In the East, Love is the basis of life.
Through Love, Intellect grows acquainted with Reality,
And Intellect gives stability to the work of Love,
Arise and lay the foundations of a new world,
By wedding Intellect to Love.”

'pacific-centered hapi me'

[universal information generation has a pacific-centered round table.]

??

*Snowy hearts find natural laws light.
See us change our dark age night
To renien world humanity
And european world citizenry.*

?

*Multi-ethnic middle country club
Is Old Worlds' sharing crossroads hub.
Bloody rites and superstition wane.
Merchant manner and goodwill gain.*

+
**Pacific
Ocean**

?

*Windy spirit, fresh grass spear,
Hear-n- heed our new world here
With inamerican care elemental.

?

New *DDays* is american character I-V, AMERI culture, and commitment to belonging to the long art of cultural democracy in human heritage.

New *DDays* celebrates Americanism from Classicism in citizen character/culture essential principles.

In american character I am: **I**Socrates tolerant skepticism, **II**Franklin rational individual republicanism, **III**Thurgood amending justice, **IV**Rushmore representing freedom, **V**Famili thansgiving friends

In AMERI Ages' peace-prosperity-progress-participation-productivity culture, I am :

Ancient basic citizen culture 4000-500BCE is ancestral survival *peace* norms for potential of family /vital economy/ intelligent enquiry/ cultured administrator/ intent of farmer

Meditation social citizen culture 500BCE-500CE-1400CE is Nature's *prosperity* with **Cultured North** Asians' chosen truth-compassion-tolerance-[equality] universal principles in natural law & order cultures of humanitarian Confucian-right Buddhan-the common good Classical citizen scientist/civilian. **Religious South** Asians appropriate ideas/principles of the Cultured North. The medieval millennium 500-1400CE of royal and faith hierarchy stays: Meditation *prosperity* citizen democracy/science evaporates from an insufficient of citizen culture advocacy.

Education physical citizen culture 1400-1700CE of *progress* with freedom educant [student-n-teacher] returns rational structures to rational people, especially the freedom education universal-social-global. The gravity force energy brings on industrial revolution that topples king royalty who are no longer need to keep sun in the sky.

Republican civil citizen culture 1700-2000CE of *participation* with world citizen, american, new republican representative expands empowered literate people-rule democracy. Franklin/Edison electro-magnetism lights up homes in the dark of night and makes possible home computing and laser technology.

Information universal citizen culture 2000CE-today of *productivity* is hapi together intercreative pacific intercreator addressing two forces of nuclear energy to enable human survival and space travel. In wonder we humans address ourselves to our universal home.

'AMERiCan Homelife Freedom Flyers'

We need american homelife volunteers. A volunteer 'freedom flyer' gets the word out that there is citizen culture with american homelife. Write your interest and send to: email@americanhomelife.org. With O.K. from AMERICAN HOMELIFE, then, go and do weekly postings of *iBook: Information Age Universal Co-creating*, page 23. Post only at public places.

Bring '*ameri can*' [world citizen] '*homelife*' [cultural democracy's human heritage] to others in your hometown. You come, too. Hapi flying!

*Our contemporary community
of dynamic democracies and dialoguing pacific world citizenry
can be hapi together.*

We feel belonging when our self-consciousness finds comfortable support in human homes of *personal* endeavor community family- *private* nurturing family -*public* country family-*planetary* famili of nations and nature home of planet:

Ancient Age *private* family in Old World famili finds potential in african Abydos, dad-mom-child.

Meditation Age *personal* endeavor community family asks natural law and order Nature with social cultured.

Education Age *public* rational teachers/ institutions support return of natural critical enquiry.

Republican Age *public* world citizens grows independent authority people-rule now democracies.

Information Age *planetary* famili of nations is universally intercreating, interconnecting, and intergenerational.

AMERI Ages culture is with forward moving citizen in Hegelian human heritage. Not ancient savage with seasonal war and bloody holy rite clergy sacrifice, nor imperial intolerant-illiterate-irrational medieval faith/royal hierarchies, but rather democracy's pacific/productive *universallInformation* conscious citizen people are rational-independent-intercreative. Goodwill *ameriren* ['world humanity'] enables/ empowers US all to global/universal *american* ['world citizen'] . Becoming individually more self-consciousness, humans increasingly change and progress. Internet, the great equalizer, let's US all in cultural democracy overcome our limited surroundings and histories. Our responsibilities-interests-projects are able to be addressed in special support communities off and on-line.

In human story of cultural democracy's human heritage we can find our way, hapi together in principle. We choose to be hapi in chosen principles we embody. Freedom weekends [in reality liberty Sundays and helping democracy Saturdays] encourage our natural inner spirit of freedom; while famili weekdays with africanDay Mon, middleDay Tues, europeanDay Wed, renienDay Thurs, and inamericanDay Fri encourage an equality format for hapi human famili of nations with informed appreciation of the good gifts given in a thansgiving good globalization. AMERI Ages culture human heritage is here in our basic-social-physical-civil-universal choices and universal experiences from which we daily find new ways to think/feel and do. Be hapi, daily! To Life!

**'Go confidently in the direction of your dreams!
Live the life (*Life*) you've imagined.'** - Thoreau.

'Franklin-n-Me'

Franklin-n-Me is a hapi together cultural activity for world citizen, me. Religion references our behavior to the supernatural intervening God of holy home heaven. Franklin-n-Me is culture that references our behavior to natural law & order in common decency of world new republican representative. In forthrightness citizen Franklin represents and encourages US all in *human heritage cultural democracy* ['homelife'], looking to self to do actions that bring harmony, making the world a little better beginning with a little better me. No longer denied literacy by clergy/king, educant citizen people read encyclopedia, write remembrance and values list, and care/share.

Franklin-n-Me is a focus of person in action with real principle in monthly common decency. We all want to be a more valuable individually rational person, so this is a values activity workshop. Citizen Franklin's list of thirteen values, given below, is matched herein with a similar hapi value. Enjoy this small exercise; then do your own. Surely, your country family has its own favorite sons/daughters to love/ remember as representatives. Put your values and favorite citizen/s together to create your own memory moniker for principled citizen common decency. Citizen of the world after Socrates is original Old American Franklin. He works on himself to become a better person. You can read his efforts in his book [Autobiography of Benjamin Franklin](#). His effort encourages our Information generation to more intercreative, openly caring/sharing effort. Let 'Franklin-n-Me' encourages each and every one to do dynamic democracy daily. Be hapi.

Winter Franklin-n-Me

*Citizen Franklin silence/tranquility-n- hapi Me is December **alive**.*

*Citizen Franklin humility-n- hapi Me is January **aware**.*

*Citizen Franklin cleanliness-n- hapi Me is February **attitude**.*

Spring Franklin-n-Me

*Citizen Franklin sincerity-n- hapi Me is March **peace-centered**.*

*Citizen Franklin frugality-n- hapi Me is April **prepared**.*

*Citizen Franklin resolution-n- hapi Me is May **purposeful**.*

Summer Franklin-n-Me

*Citizen Franklin chastity-n- hapi Me is June **imbued with family**.*

*Citizen Franklin moderation/temperance-n- hapi Me is July **independent**.*

*Citizen Franklin purity-n- hapi Me is August **ideas**.*

Autumn Franklin-n-Me

*Citizen Franklin justice-n- hapi Me is September **honest**.*

*Citizen Franklin industry-n- hapi Me is October **helping**.*

*Citizen Franklin order-n- hapi ME is November **hope**.*

Now it's your turn to make a personal self-help list. Include at least one of your favorite civil democracy representatives. Don't forget to have and keep a personal diary.

Internet generation puts peace as priority. In the name of God our clergy in supernatural religion worship God who is usually a man, with a life, and with national root, sometimes a tribal chief who goes to war. In principles we care natural culture with citizen in civil season and hapi month. Let US all in cultural democracy's human heritage remember that: in the name of God is clergy-rule religion; in principle is human culture; in principle is citizen republic in the rule of law principle under common law constitution from natural law Nature's reason to think and find.

We make things better because it's a good thing to do. In you is networking mutual modernity in pacific productivity. In you is human agent for positive change. In each of you is passion for understanding, my nurturing family, and our public home citizen that joins in cooperation over domination US all in hapi human home- hapi human famili of nations- hapi humanhood.

Pacific people are interactive global learners. Our healthy harvest home laughter, seeing mind, hearing body, and loyal heart is learning new ways and becoming daily more thoughtful to new horizons. We learn with the wholeness of our being. Every person is partial. Every nationality is partial. Every native continental ancestral family heritage and member is partial. Partiality is a human condition. So, one way to become globally interactive learners is to put our parts together, communicating together and helping US all learn in thanxgiving the wholesome real story from social history in viewpoints shared. Hapi human famili of nations sharing different human stories, viewpoints, and social history around common issues- ideas-ideals in freedom homelife has the purpose, 'Life, Liberty, and the pursuist of happiness...' Pacific people respect others in sincerity.

Our strategies for 'talking things out' change over time. We've gone from sitting and talking around friendly savage campfires to equality Arthurian and samurai knightly tables. We've gone from small thirteen colonies of staunch and firm pioneers for human Rights of Englishmen in cultural freedom to many sitting and talking together with representatives in congresses of democracies' communities. Vision of a larger pacific forum for sharing and caring is already here in the UN. There will be more. Countries and nation states and citizens communicating for growing peace/understanding is where we can all be hapi together. AMERiCAn Homelife is one among many participating in the creating-strenghtening-expanding vision for democracies' communities. Pacific is common purpose: Productive is cooperative effect. With our unique democracies' rushmores to role model fundamental *freedom life liberty-integrity-fraternity-equality*, I see rushmore reps in every person individually and daily interacting with others.

Citizen, avoid imperialism at home and abroad, achieve mutual democracy communities, and do your own agenda in freedom homelife liberty-integrity-fratenity-equality. How disappointing to see U.S. first republic after WWII doing imperial empire agenda in foreign policy! Common citizen culture agenda is consistent in principles at home and abroad, and is never to be confused with royal corporations nor clergy religions who took down once and shall never take down again citizen culture to another dark age. Fundamental separation/ balance of powers keeps US all more safe and secure. Then, our *universalInformation* generation will come into the hapi fullness of human heritage inheritance in cultural democracy. Then, our contemporary nuclear generation will not have a sad hijacker Ziad Jarrah do his violence 9/11/2001 to United Airlines Flight 93 saying, "Allah is the greatest!" Global oligarchal institutions of rich royal culture don't take care of your democracy economy, you do, country family citizen. Faith hierarchies or religions don't take care of your democracy freedom homelife,... you do, country family citizen. With american character tolerant-rational-amending-representing-thanxgiving and AMERI Ages expanding culture Ancient basic peace-Meditation social prosperity-Education physical progress-Republican american participation-Information universal productivity may we all continue the legacy of forthright forebearers, givers of human heritage in cultural democracy. Be hapi together in american homelife.

Homemaker in Homelife

*I welcome warm civility
Of cultural democracy.
In principles I chose to be
Become my own eternity.
Care culture, new republican.
We ameri say 'I can.'*

*I'm american, 'world citizenry',
homelife, 'cultural democracy'.
I'm cultured citizen scientist/ civilian.
I'm the common good human, not superman,
Nature home world is here.
My human homes are dear.*

*My natural environment, air-water-earth-fire,
Is Nature **home heir/air-ocean-mountain-energy entire.**
I nurture human homes, human-citizen-family-me,
In social **homeLife** liberty-integrity-fraternity-equality.
I'm citizen science/society in **homeLife** human heritage.
I live Good Life reality, not magical mirage.*

*Whether theist or deist, we're all naturalist,
For natural law & order Nature is our assist.
In citizen culture tolerant universal principle I ask,
For freedom education and freedom homelife task.
Pacific-centered, hapi together co-create homelife.
Homemaker in homelife, I overcome strife.*

'For Truth'

**Ask Nature in reasoned culture.
Pray God in revelation religion.
Comfort ye in our foundation,
Truth timeless.**

'Be Hapi.'

*Militant dictator 'caesars' do all they can.
Royal corporations/bankers ignore human.
People need people for mutual modernity
In intercreative, global, economic policy.*

*Will royal/religion agendas again become cause
Of effect in lost homelife order and laws
First with Classicism
Then Americanism?
Will democracy ever be in Middle East?
Must citizen people tag plutocrat/priest?*

*Long life in just culture with new republican,
In freedom education/rational action american. [world citizen]
Celebrate freedom charters' birthday.
Welcome, world citizen culture everyday.
Not forgotten are forbearers of Classicism
With US all advocating now Americanism.*

*Long live social citizen culture meditating.
Long live physical citizen culture asking.
Within natural law Nature's reason together,
We're citizen scientist/civilian in homelife here.*

*Protect our nature home world home
From careless who ignore gnome.
Visceral force-n-WMD power,
Isn't the american voting, him-n-her.*

*With all Ancient ancestors again gaze toward sky.
Be adventuring space travelers of new horizons sci-fi.
Hapi vision, Pacific Round Table, share we the strong.
Talk together, work it out, and learn to get along.*

*Only we are to blame
Should another dark age reign.
Long art, american homelife, enthrall!
Information generation, respect is US all! Be hapi.*

Becoming
cultured in
AMERI Ages Awareness.

Become *basic* **A**ncient aidgiver, *survivor*

We ameri [all people] do family-economy-enquiry-administrator-farmer.

Become *social* **M**editation meditator, *honest to Life*

Intuitive-rational-empirical, ask Nature's reason for common sense/empathy ideas.

Become *physical* **E**ducation educant, *freedom homelife educated*

Support rational structures and freedom education.

Become *civil* **R**epublican representative, *world citizen*

In an american amendment one aware cultural democracy tradition with separation of powers fundamental in rich king [global oligarchal institutions]-supernatural clergy [hierarchal faiths]-natural citizen [people-rule democracy] for balance and survival of new common citizen culture.

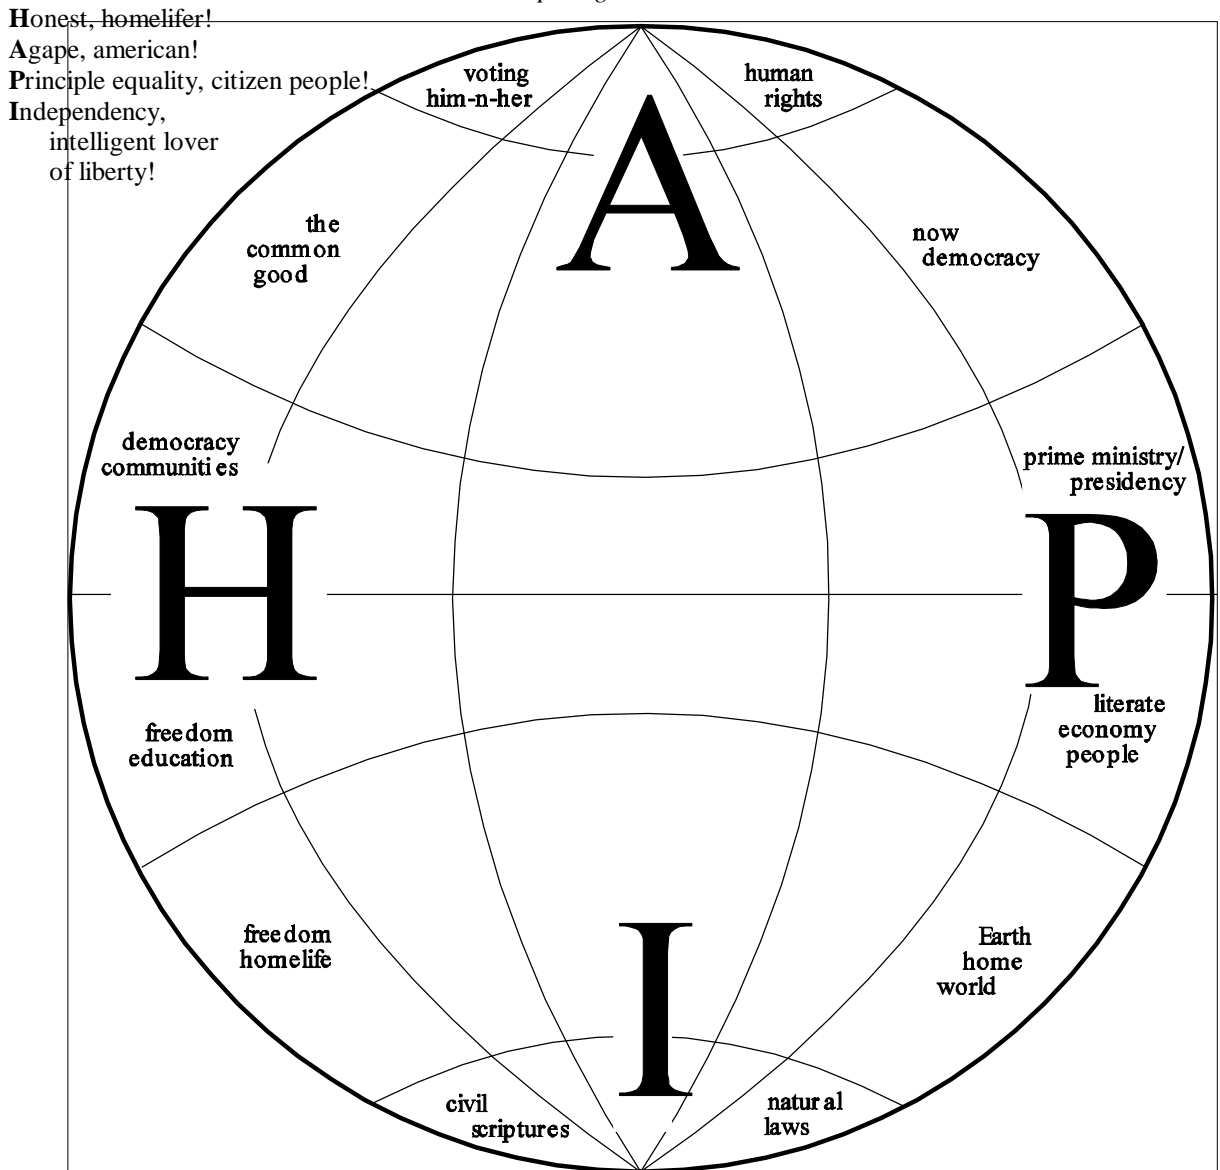

Become *universal* **I**nformation intercreator, *pacific producer*

Hapi in activities that unite world famili and in pacific nuclear future of human survival/ space travel.

To be or not to be citizen cultured in timeless Truth and universal principles whether natural theist, natural deist, or pure naturalist! Joining means and dreams, citizen people belong to the long art of natural culture with citizen. In AMERIcan Homelife we care/share/understand the american character, AMERI Ages culture, and commitment to be plural positive human famili cultural democracy. Human heritage in cultural democracy is human home [self-family-citizenry-humanity] and nature home. Asking Nature's reason, we are unfolding universal principles physical with science, social with society. U.S. American democracy & tradition from Washington to Warren are just principles citizen people choose to live in natural rights human freedom civil society. Remembering Americanism from Classicism, we avoid another intolerant-illiterate-irrational dark age millennium of hierarchs by keeping separation & balance of fundamental powers [royal-religion-republican]. Be hapi together civil season and new ddays. Do 'New DDays New Story' I-II-III-IV-V / A-M-E-R-I. From forthright forbearers in human story we ameri [all people] can have homelife in citizen culture basic-social-physical-civil-universal. Live human survivability, ones life in Life.

With *Book of Life* [Nature] meditate Life, we cultured including citizen. With *Word of God* praise intervening God, we religious with our clergy. Both natural culture and supernatural religion agree we are here to help. So let it be! Who among all natural cultures and all supernatural religions can be known in humanhood as the very best of helpers of ren-right-agape-fraternity-brotherhood of man-general welfare here-now-today?

Art Center

In music/word meditation
with AMERICAN HOMELIFE

Hapi homelife music/word celebrates our human heritage in world citizen culture.

**'Hapi Homelife' music is melody written to cherish the
loved/ famous words from human heritage forbearer in citizen culture everywhere.**

**'Hapi Homelife' word is written to cherish loved / famous universal principle, civil
scripture, and human heritage forbearer in citizen culture everywhere.**

'Human Rights'

? Turn on the light of our ren community,
Civil light of our home *fraternity*,
Turn on the light of our world humanity,
Human Rights! Chosen rights!
Let it shine with me.?

Human Rights, Bill of Rights 15 Dec 1791, is a freedom civil scripture of 1st new republic U.S.
whose citizenry neglects to the point of not even writing it on common citizen calendar much
less giving it the proper attention/recitation/celebration! What is your human rights scripture?

U.S. Bill of Rights includes the famous Amendment One check on clergy-power.

'Hapi December Human Rights Remember' is a world citizen culture joy
with U.S Human Rights Dec. 15 and U.N. Human Rights Dec.10. ? ?

Sing above words to tune 'This Little Light of Mine'.

You may add your verse/s to the above words, including your own human rights civil
scripture as referenced source. Let us hear from you, email@americanhomelife.org. Hapi homelife!

!For forbearers who give US all treasures of spirited thought to care/ share/ understand in world citizen culture!

Keep the universal information culture!

Welcome to 'democracy's playground'. Enjoy/ explore world citizen cultural democracy's long human heritage. Hapi homelife!
